## **DETAILED ACTION**

Claims 27-40 are currently pending in the application and are addressed herein.

## Election/Restrictions

- 1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 27-35, drawn to a method for stimulating an immune response, classified in class 514, subclass 2.
  - II. Claims 36-40, drawn to a method for treating cancer, classified in class 514, subclass 2.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are unrelated methods. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together or they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are different methods with different modes of operation, different functions, or different effects. For instance, the function and desired effect of Invention I is to stimulate the human system, while the function and desired effect of Invention II is to treat (which includes preventing) cancer.

Application/Control Number: 09/874,166

Art Unit: 1635

Page 3

3. Because these inventions are distinct for the reasons given above and the search required for Group I is distinct from the search required for Group II (i.e. the searches are not coextensive), restriction for examination purposes as indicated is proper.

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
